three ducks direct clock: *A Bit of Good Luck* Frank McGurk, 2023-02-03 A young man slings his duffel bag over his shoulder and begins a journey of a lifetime. In this true story, young Frank learns more in a day than all his life up to that point but, ironically, he's left with more questions than answers! Do lobsters whistle? Are sleep and driving mutually exclusive? Now, over 50 years

later, Frank recalls that day, the highs and lows, the stops and starts and the emotional end to his odyssey. With his mission to meet up with his father at the opposite end of Ireland, this funny, yet poignant story paints a landscape that is fading over time and will leave you wondering where life's true characters have gone. Have they really disappeared? Or are they waiting patiently, thumbs out, waiting to be picked up again? Readers will never predict the trials and tribulations of Frank McGurk in 1960s and '70s Ireland – neither did Frank. Where exactly is no man's land? Was the smuggling run 'a washing machine too far'? And what were Frank's true dealings with the oil sheikhs from the Middle East? Potholes without the plot holes, A Bit of Good Luck (and other short stories) evoke a bygone era where a journey was an adventure, and the open road was an open mic for every character to stand up and take a bow.

'A superlative guide to some of the most intriguing questions of human existence' - Bill Bryson, author of The Body: A Guide for Occupants 'Who knew our body clocks determined so much of our health, happiness, and lifespan? I learned so much' - James Nestor, author of Breath In the twenty-first century, we increasingly push our daily routines into the night, carrying out work, exercise and our social lives long after dark. But we have forgotten that our bodies are governed by a 24-hour biological clock which guides us towards the best time to sleep, eat and think. In Life Time, Professor Russell Foster shares his life's work, taking us on a fascinating and surprising journey through the science of our body clocks. Using his own studies, as well as insights from an international community of sleep scientists and biologists studying circadian rhythms, he illustrates the surprising effects the time of day can have on our health, including: - how a walk outside at dawn can ensure a better night's sleep - how eating after sundown can affect our weight - the extraordinary effects the time we take our medication can have on our risk of life-threatening conditions, such as strokes In the modern world, we have neglected an essential part of our biology. But with knowledge of this astonishing science, we can get back into the rhythm, and live healthier, sharper lives. Sunday Times bestseller, January 2023

three ducks direct clock: *Ducks of Britain and Europe* M. A. Ogilvie, 2010-09-30 The forty-two species or subspecies of ducks which occur in Europe, including eleven vagrants from North America or Asia, are the subject of this book. Its author is an accepted authority on ducks and geese, and has been a member of the research staff of the Wildfowl Trust at Slimbridge since 1960. Most birdwatchers consider ducks to be especially attractive and interesting birds, and many species of ducks are also the legitimate quarry of wildfowlers. Both groups need to identify the species quickly and accurately, and almost half of the book is devoted to identification, offering a far more detailed account than is to be found in any of the field guides. There are detailed descriptions, species by species, of the adult males and females, immature birds, eclipse males, and downy young - voice, too, is dealt with - and full-colour plates of males and females show the flight patterns, so important for correct species identification. The habits of European ducks are treated in chapters on behaviour and ecology, breeding biology, distribution and status, and the ever-fascinating topic of migration and navigation. The distribution chapter has maps showing the summer and winter ranges in Europe, North Africa, the Middle East and Central Russia, for 24 species. 'A final chapter considers the present day threats to ducks and their wetland habitats, and the conservation measures being taken to combat the threats.
