Guilbeau, 2018 While issues of higher education access, opportunity, and impact are hotly debated on the floors of Congress and in state legislatures, it is the state's higher education executive officer (SHEEO) who is expected to be an innovative policymaker, an astute political actor, an all-seeing fortune-teller, and a rapid problem-solver. These professionals must achieve a balancing act between political agendas and academic freedom while ensuring that the institutions they represent are maximizing their contribution to the larger public good and preparing students to become contributing citizens. Thus began a now eight-decade long association that has flowered into one of the world's largest collaborations between a federal agency and a research university--
