titans curse ebook: *Human Virtuality and Digital Life* Richard Frankel, Victor J. Krebs, 2021-08-12 Winner of the Gradiva® Best Book Award 2022, and the Courage to Dream Book Prize 2023 from the Academy of the American Psychoanalytic Association! This book is a psychoanalytic and philosophical exploration of how the digital is transforming our perception of the world and our understanding of ourselves. Drawing on examples from everyday life, myth, and popular culture, this book argues that virtual reality is only the latest instantiation of the phenomenon of the virtual, which is intrinsic to human being. It illuminates what is at stake in our understanding of the relationship between the virtual and the real, showing how our present technologies both enhance and diminish our psychological lives. The authors claim that technology is a *pharmakon* - at the same time both a remedy and a poison - and in their writing exemplify a method that overcomes the polarization that compels us to regard it either as a liberating force or a dangerous threat in human life. The digital revolution challenges us to reckon with the implications of what is being called our posthuman condition, leaving behind our modern conception of the world as constituted by atemporal essences and reconceiving it instead as one of processes and change. The book's postscript considers the sudden plunge into the virtual effected by the 2020 global pandemic. Accessible and wide-reaching, this book will appeal not only to psychotherapists, psychoanalysts, and philosophers, but anyone interested in the ways virtuality and the digital are transforming our

contemporary lives.

titans curse ebook: Children's Literature and the Posthuman Zoe Jaques, 2015-02-11 An investigation of identity formation in children's literature, this book brings together children's literature and recent critical concerns with posthuman identity to argue that children's fiction offers sophisticated interventions into debates about what it means to be human, and in particular about humanity's relationship to animals and the natural world. In complicating questions of human identity, ecology, gender, and technology, Jaques engages with a multifaceted posthumanism to understand how philosophy can emerge from children's fantasy, disclosing how such fantasy can build upon earlier traditions to represent complex issues of humanness to younger audiences. Interrogating the place of the human through the non-human (whether animal or mechanical) leads this book to have interpretations that radically depart from the critical tradition, which, in its concerns with the socialization and representation of the child, has ignored larger epistemologies of humanness. The book considers canonical texts of children's literature alongside recent bestsellers and films, locating texts such as Gulliver's Travels (1726), Pinocchio (1883) and the Alice books (1865, 1871) as important works in the evolution of posthuman ideas. This study provides radical new readings of children's literature and demonstrates that the genre offers sophisticated interventions into the nature, boundaries and dominion of humanity.
