unblocked youtube for school: Everyday Schooling in the Digital Age Neil Selwyn, Selena Nemorin, Scott Bulfin, Nicola F. Johnson, 2017-11-20 Today's high schools are increasingly based around the use of digital technologies. Students and teachers are encouraged to 'Bring Your Own Device', teaching takes place through 'learning management systems' and educators are rushing to implement innovations such as flipped classrooms, personalized learning, analytics and 'maker' technologies. Yet despite these developments, the core processes of school appear to have altered little over the past 50 years. As the twenty-first century progresses, concerns are growing that the basic model of 'school' is 'broken' and no longer 'fit for purpose'. This book moves beyond the hype and examines the everyday realities of digital technology use in today's high schools. Based on a major ethnographic study of three contrasting Australian schools, the authors lay bare the reasons underlying the inconsistent impact of digital technologies on day-to-day schooling. The book examines leadership and management of technology in schools, the changing nature of teachers' work in the digital age, as well as student (mis)uses of technologies in and out of classrooms. In-depth case studies are presented of the adoption of personalized learning apps, social media and 3D printers. These investigations all lead to a detailed understanding of why schools make use of digital technologies in the ways that they do. *Everyday Schooling in the Digital Age: High School, High Tech?* offers a revealing analysis of the realities of contemporary schools and schooling - drawing on arguments and debates from various academic literatures such as policy studies, sociology of education, social studies of technology, media and communication studies. Over the course of ten wide-ranging chapters, a range of suggestions are developed as to how the full potential of digital technology might be realized within schools. Written in a detailed but accessible manner, this book offers an ambitious critique that is essential reading for anyone interested in the fast-changing nature of contemporary education.

unblocked youtube for school: Identity-Focused ELA Teaching Richard Beach, Anthony Johnston, Amanda Haertling Thein, 2015-03-05 Countering the increased standardization of English language arts instruction requires recognizing and fostering students' unique identity construction across different social and cultural contexts. Drawing on current sociocultural theories of identity construction, this book posits that students construct multiple identities through use of five identity practices: adopting alternative perspectives, exploring connections across people and texts, negotiating identities across social worlds, developing agency through critical analysis, and reflecting on long-term identity trajectories. Identity-Focused ELA Teaching features classroom activities teachers can use to put these practices into action in ways that re-center implementing the Common Core State Standards; case-study profiles of students and classrooms from urban, suburban, and rural schools adopting these practices; and descriptions of how teachers both support students with this instructional approach and share their own identity-construction experiences with their students. It demonstrates how, as students acquire identity-focused practices through engagements with literature, writing, drama, and digital texts, they gain awareness of the ways exposure to different narratives, beliefs, and perspectives serves to mediate their own and others' identities, leading to different ways of being and becoming over time.

These are complemented with a Germany-wide questionnaire survey among participants in the U.S. Embassy School Election Project - an intercultural, blended language learning project that has drawn over 15,000 participants since 2012.

unblocked youtube for school: Core Values in School Librarianship Judi Moreillon, 2021-05-11 This title offers pre-service, newly practicing, and seasoned school librarians opportunities for reflection as well as inspiring strategies for enacting four core values of the profession. The school library profession has been in crisis for more than a decade. Educational decision-makers have not been made aware of or sold on the core values of school librarianship and its value to students, classroom teachers, administrators, and the entire school community. Budgetary priorities often do not include school librarians, resulting in a lack of funding and the elimination of many positions, which can cause many school librarians to feel vulnerable and afraid. Guideposts are needed to offer today's school librarians a chance to connect or reconnect with their passion for literacy, learning, and serving that led them to the profession. Core Values in School Librarianship: Responding with Commitment and Courage provides preservice, newly practicing, and seasoned school librarians with opportunities for thoughtful reflection alongside inspiring strategies for gathering courage and enacting four core values of the profession.
