urban fiction books pdf: The Routledge Companion to Urban Imaginaries Christoph Lindner, Miriam Meissner, 2018-09-28 The Routledge Companion to Urban Imaginaries delves into examples of urban imaginaries across multiple media and geographies: from new visions of smart, eco, and resilient cities to urban dystopias in popular culture; from architectural renderings of starchitecture and luxury living to performative activism for new spatial justice; and from speculative experiments in urban planning, fiction, and photography to augmented urban realities in crowd-mapping and mobile apps. The volume brings various global perspectives together and into close dialogue to offer a broad, interdisciplinary, and critical overview of the current state of research on urban imaginaries. Questioning the politics of urban imagination, the companion gives particular attention to the role that urban imaginaries play in shaping the future of urban societies, communities, and built environments. Throughout the companion, issues of power, resistance, and uneven geographical development remain central. Adopting a transnational perspective, the volume challenges research on urban imaginaries from the perspective of globalization and postcolonial studies, inviting critical reconsiderations of urbanism in its diverse current forms and definitions. In the process, the companion explores issues of Western-centrism in urban research and design, and accommodates current attempts to radically rethink urban form and experience. This is an essential resource for scholars and graduate researchers in the fields of urban planning and architecture; art, media, and cultural studies; film, visual, and literary studies; sociology and political science; geography; and anthropology.

urban fiction books pdf: The story of your city Greg Clark, Tim Moonen, Jake Nunley, 2018-10-31 By the end of this century, 9 out of 10 Europeans will live in an urban area. But what kind of city will they call home? You'll find all the answers in CITY, TRANSFORMED, the new essay series from the European Investment Bank. This panoramic first essay in the series lays out a great sweeping history of European cities over the last fifty years—and showcases new directions being taken by some of our most innovative cities. Urban experts Greg Clark, Tim Moonen, and Jake Nunley based at University College London take a definitive look at how Europe's cities transformed from post-industrial decline to thriving metropolises that are as prosperous and liveable as anywhere on Earth.

urban fiction books pdf: Street Vending in the Neoliberal City Kristina Graaff, Noa Ha, 2015-10-01 Examining street vending as a global, urban, and informalized practice found both in the Global North and Global South, this volume presents contributions from international scholars

working in cities as diverse as Berlin, Dhaka, New York City, Los Angeles, Calcutta, Rio de Janeiro, and Mexico City. The aim of this global approach is to repudiate the assumption that street vending is usually carried out in the Southern hemisphere and to reveal how it also represents an essential—and constantly growing—economic practice in urban centers of the Global North. Although street vending activities vary due to local specificities, this anthology illustrates how these urban practices can also reveal global ties and developments.

urban fiction books pdf: Beyond the Informal Ninik Suhartini, Paul Jones, 2023-01-01 This book provides a much-needed analysis of the pivotal role of the urban kampung in Indonesia's urbanization process and importantly, provides a deeper understanding of how these communities create their complex socio-physical environments through self-organization. The book challenges the current formal approaches and practices to modern planning in Indonesia where many kampungs are classed as illegal and excluded from city plans. Beyond informality unpacks via three case studies the self-generated planning and development arrangements and mechanisms which occur parallel to processes of formal exclusion, adaptation, negotiation and modification. Kampungs are posited as inseparable urban entities contributing to the complex assemblage of the city and the dynamics of contemporary urban planning and design. In the context of planning and design practice, this book provides a better understanding on how one needs to consider human-scale urbanism to achieve more effective and efficient planning plans and policies in the self-organized city. Even though self-organization by residents comes with its challenges as outlined in the book, formal planning in both Indonesia and other developing countries has much to learn from understanding self-organized settlements (kampung) and informal settlements 'as they are'.

urban fiction books pdf: The Readers' Advisory Guide to Street Literature Vanessa Irvin Morris, 2012 Emphasizing an appreciation for street lit as a way to promote reading and library use, Morris's book helps library staff establish their "street cred" by giving them the information they need to provide knowledgeable guidance.

urban fiction books pdf: Literature for Young Adults Joan L. Knickerbocker, 2017-03-15 Young adults are actively looking for anything that connects them with the changes happening in their lives, and the books discussed throughout *Literature for Young Adults* have the potential to make that connection and motivate them to read. It explores a great variety of works, genres, and formats, but it places special emphasis on contemporary works whose nontraditional themes, protagonists, and literary conventions make them well suited to young adult readers. It also looks at the ways in which contemporary readers access and share the works they're reading, and it shows teachers ways to incorporate nontraditional ways of accessing and sharing books throughout their literature programs. In addition to traditional genre chapters, *Literature for Young Adults* includes chapters on literary nonfiction; poetry, short stories, and drama; cover art, picture books, illustrated literature, and graphic novels; and film. It recognizes that, while films can be used to complement print literature, they are also a literacy format in their own right—and one that young adults are particularly familiar and comfortable with. The book's discussion of literary language—including traditional elements as well as metafictional terms—enables readers to share in a literary conversation with their students (and others) when communicating about books. It will help readers teach young adults the language they need to articulate their responses to the books they are reading.

urban fiction books pdf: Future is Urban: Livability, Resilience & Resource Conservation Utpal Sharma, R. Parthasarathy, Dr Aparna, 2023-05-26 Cities have played an important role in our lives since the dawn of civilization. However, cities are slowly becoming overwhelmed and therefore intervention is desirable towards green, blue and egalitarian nature. Even with current urban issues, we must rise to the occasion as professionals to create cities that are social, cities that take care of the environment, and cities that are digital. Increased citizen participation is indispensable in this process. The 'International Conference on Future is Urban (IFCU' 21) Dec 16-18, 2021, Ahmedabad, India', takes into account Livability, Resilience & Resource Conservation for planning Future and cities in future.

urban fiction books pdf: Low Carbon Mobility Transitions Debbie Hopkins, James E. S. Higham, 2016 * A thorough exploration of low carbon mobility transitions from a range of disciplinary and theoretical perspectives;* A broad view of low carbon transition across travel, transport, tourism and mobilities studies;* A critical exploration of the global, regional and local prospects for low carbon mobility transitions; * Illustrating examples of low carbon transition, from leading scholars researching in a wide range of geographic contexts.Arranged in three interrelated sections; People and Place, Structures in Transition, and Innovations for Low Carbon Mobility, Low Carbon Mobility Transitions presents nineteen theoretically-informed, empirically grounded chapters and case studies that comprehensively address the prospects for global, regional, and local systemic transitions to low carbon mobility. Bringing together the work of leading researchers from 26 universities, research centres and consultancies, spanning six continents, it critically explores the wide-ranging regional contexts in which a low carbon transition has been, is being, or can be achieved. In doing so, it highlights the place-specific, geopolitical and cultural sensitivities of low carbon transitions at national, regional and local (urban) scales. The overlapping roles of technological innovation, behaviour change and policy frameworks are critically examined in this book, providing timely insights into the opportunities for decarbonising the current systems of transport, in order to achieve the radical emissions reductions required to prevent lasting impacts of climate change.Highlights of the book include:* Multidisciplinary and interdisciplinary insights into low carbon mobility transitions;* Research-informed chapters and case studies including a range of geographic contexts across the global North and South;* New perspectives on the intersecting and overlapping roles of technological innovation, behaviour change and policy frameworks;* Expert assessments of systemic low carbon transition.About the EditorsDebbie Hopkins is a Research Fellow at the Transport Studies Unit, School of Geography and the Environment, University of Oxford (UK), and a Junior Research Fellow in Geography at Mansfield College, Oxford. James Higham is a Professor in the Department of Tourism, University of Otago (New Zealand), Visiting Professor, University of Stavanger (Norway) and co-editor of the Journal of Sustainable Tourism.

urban fiction books pdf: Cyclescapes of the Unequal City John G. Stehlin, 2019-10-01 A critical look at the political economy of urban bicycle infrastructure in the United States Not long ago, bicycling in the city was considered a radical statement or a last resort, and few cyclists braved the inhospitable streets of most American cities. Today, however, the urban cyclist represents progress and the urban “renaissance.” City leaders now undertake ambitious new bicycle infrastructure plans and bike share schemes to promote the environmental, social, and economic health of the city and its residents. Cyclescapes of the Unequal City contextualizes and critically examines this new wave of bicycling in American cities, exploring how bicycle infrastructure planning has become a key symbol of—and site of conflict over—uneven urban development. John G. Stehlin traces bicycling’s rise in popularity as a key policy solution for American cities facing the environmental, economic, and social contradictions of the previous century of sprawl. Using in-depth case studies from San Francisco, Philadelphia, and Detroit, he argues that the mission of bicycle advocacy has converged with, and reshaped, the urban growth machine around a model of livable, environmentally friendly, and innovation-based urban capitalism. While advocates envision a more sustainable city for all, the deployment of bicycle infrastructure within the framework of the neoliberal city in many ways intensifies divisions along lines of race, class, and space. Cyclescapes of the Unequal City speaks to a growing interest in bicycling as an urban economic and environmental strategy, its role in the politics of gentrification, and efforts to build more diverse coalitions of bicycle advocates. Grounding

its analysis in both regional political economy and neighborhood-based ethnography, this book ultimately uses the bicycle as a lens to view major shifts in today's American city.

urban fiction books pdf: *Triumph of the City* Edward Glaeser, 2011-02-10 Shortlisted for the Financial Times and McKinsey Best Book of the Year Award in 2011 “A masterpiece.” —Steven D. Levitt, coauthor of *Freakonomics* “Bursting with insights.” —The New York Times Book Review A pioneering urban economist presents a myth-shattering look at the majesty and greatness of cities America is an urban nation, yet cities get a bad rap: they're dirty, poor, unhealthy, environmentally unfriendly . . . or are they? In this revelatory book, Edward Glaeser, a leading urban economist, declares that cities are actually the healthiest, greenest, and richest (in both cultural and economic terms) places to live. He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the best in humankind. Using intrepid reportage, keen analysis, and cogent argument, Glaeser makes an urgent, eloquent case for the city's importance and splendor, offering inspiring proof that the city is humanity's greatest creation and our best hope for the future.

urban fiction books pdf: *The Gentrification Plot* Thomas Heise, 2021-12-21 For decades, crime novelists have set their stories in New York City, a place long famed for decay, danger, and intrigue. What happens when the mean streets of the city are no longer quite so mean? In the wake of an unprecedented drop in crime in the 1990s and the real-estate development boom in the early 2000s, a new suspect is on the scene: gentrification. Thomas Heise identifies and investigates the emerging “gentrification plot” in contemporary crime fiction. He considers recent novels that depict the sweeping transformations of five iconic neighborhoods—the Lower East Side, Chinatown, Red Hook, Harlem, and Bedford-Stuyvesant—that have been central to African American, Latinx, immigrant, and blue-collar life in the city. Heise reads works by Richard Price, Henry Chang, Gabriel

Cohen, Reggie Nadelson, Ivy Pochoda, Grace Edwards, Ernesto Quiñonez, Wil Medearis, and Brian Platzer, tracking their representations of “broken-windows” policing, cultural erasure, racial conflict, class grievance, and displacement. Placing their novels in conversation with oral histories, urban planning, and policing theory, he explores crime fiction’s contradictory and ambivalent portrayals of the postindustrial city’s dizzying metamorphoses while underscoring the material conditions of the genre. A timely and powerful book, *The Gentrification Plot* reveals how today’s crime writers narrate the death—or murder—of a place and a way of life.

urban fiction books pdf: *The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design* Jon Lang, 2020-11-09 *The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design* is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years. The ideas and projects, hypothetical and built, range in scale from the city to the urban block level. The focus is on where the generic ideas originated, the projects that were designed following their precepts, the functions they address and/or afford, and what we can learn from them. The morphology of a city—its built environment—evolves unselfconsciously as private and governmental investors self-consciously erect buildings and infrastructure in a pragmatic, piecemeal manner to meet their own ends. Philosophers, novelists, architects, and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez-faire attitude to urban development. Rationalist theorists dream of ideal futures based on assumptions about what is good; empiricists draw inspirations from what they perceive to be working well in existing situations. Both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs. This book traces the history of these ideas and will become a standard reference for scholars and students interested in the history of urban spaces, including architects, planners, urban historians, urban geographers, and urban morphologists.

urban fiction books pdf: *Genre and the City* Michael Shapiro, 2013-10-31 This book’s chapters analyze aspects of urban politics with a combination of critical thinking (influenced by Walter Benjamin, Jacques Ranciere, Henri Lefebvre, and Achille Mbembe, among others) and readings of artistic genres (film, literature, and architecture). The coverage of cities includes, Tokyo, Paris, New York, Nairobi, Boston, Berlin and Hong Kong.

urban fiction books pdf: *Social Justice and Cultural Competency* Marcia A. Mardis, Dianne Oberg, 2019-11-20 Published in partnership with the International Association of School Librarianship, this work gathers together the latest and most important research on the topics of social justice and cultural competency in school libraries. Education systems today are expected to advance national goals related to fairness, equity, and social cohesion. Comprising articles written and collected in the journal of the International Association of School Librarianship and new articles written especially for this anthology, this book documents both empirical research and promising practices to help school librarians and teachers work together to promote social justice and develop learners’ and educators’ cultural competence. Both coeditors are experienced in working with authors from around the world and have participated in the development of effective and ethical standards and guidelines for school library practitioners. Brief real-life case studies of school librarians and teachers in action showcase efforts to improve the lives of marginalized or under-served students. School librarians inside and outside of the United States, school library educators and policymakers, and academic librarians building school librarianship collections will find this guide valuable.

urban fiction books pdf: *Co-Crafting the Just City* James A. Throgmorton, 2022-03-23 The 2016 election in Iowa City would provide an opportunity that planning faculty have long desired: the opportunity for one of their own to serve as mayor. In this new book, former Iowa City Mayor and Professor Emeritus James A. Throgmorton provides readers a sense of what democratically-elected city council members and mayors in the United States do and what it feels like to occupy and enact those roles. He does so by telling a set of “practice stories” focusing primarily, but not exclusively,

on what he, a retired planning professor at the University of Iowa, experienced and learned as a council member from 2012 through 2019 and, simultaneously, as mayor from 2016 through 2019. The book proposes a practical, action-oriented theory about how city futures are being (and can be) shaped, showing that storytelling of various kinds plays a very important but poorly understood role in the co-crafting process, and demonstrating that skillful use of ethically-sound persuasive storytelling (especially by mayors) can improve our collective capacity to create better places. The book documents efforts to alleviate race-related inequities, increase the supply of affordable housing, adopt an ambitious climate action plan, improve relationships between city government and diverse marginalized communities, pursue more inclusive and sustainable land development codes/policies, and more. It will be of great interest to urban planning faculty and students and elected officials looking to collaboratively craft better cities for the future.

urban fiction books pdf: Comparative Literature for the New Century Giulia De Gasperi, Joseph Pivato, 2018-09-30 Since its beginning, Comparative Literature has been characterized as a discipline in crisis. But its shifting boundaries are its strength, allowing for collaboration and growth and illuminating a path forward. In *Comparative Literature for the New Century* a diverse group of scholars argue for a distinct North American approach to literary studies that includes the promotion of different languages. Chapters by senior scholars such as George Elliott Clarke, E.D. Blodgett, and Sneja Gunew are placed in dialogue with those by younger scholars, including Dominique Hétu, Maria Cristina Seccia, and Ndeye Fatou Ba. The writers, many of whom are multilingual, discuss problems with translation, identity and belonging, the modern epic, the role of tradition, minority writing, Francophone and Anglophone novels in Africa, and politics in literature. Engaging with theory, history, media studies, psychology, translation studies, post-colonial studies, and gender studies, chapters exemplify how the knowledge and tools offered by Comparative Literature can be applied in reading, exploring, and understanding not only literary productions but also the world at large. Presenting some of the most current work being carried out by academics and scholars actively engaged in the field in Canada and abroad, *Comparative Literature for the New Century* promotes the value of Comparative Literature as an interdisciplinary study and assesses future directions it might take. Contributors include George Elliott Clarke (University of Toronto), Dominique Hétu (Alberta & Montreal), Monique Tschofen (Ryerson), Jolene Armstrong (Athabasca), E.D. Blodgett (Alberta), Ndeye Fatou Ba (Ryerson), Maria Cristina Seccia (Hull), Sneja Gunew (UBC), Deborah Saidero (Udine), Elizabeth Dahab (CSULB), Gaetano Rando (Wollongong), Anna Pia De Luca (Udine), Mark A. McCutcheon (Athabasca), Giulia De Gasperi (PEI), and Joseph Pivato (Athabasca).
