urban mystery hints: Bodies of Evidence Amanda C. Seaman, 2004-02-28 The publication in 1992 of Miyabe Miyuke's highly anticipated *Kasha* (translated into English as *All She Was Worth*) represents a watershed in the history of Japanese women's detective fiction. Inspired by Miyabe's success and the increasing number of Western mysteries in translation, women began writing mysteries of all types, employing the narrative and conceptual resources of the detective genre to depict and critique contemporary Japanese society—and the situation of women in it. *Bodies of Evidence* examines this recent boom and the ways in which five contemporary authors (Miyabe, Nonami Asa, Shibata Yoshiki, Kirino Natsuo, and Matsuo Yumi) critically engage with a variety of social issues and concerns: consumerism and the crisis of identity, discrimination and harassment in the workplace, sexual harassment and sexual violence, and motherhood. *Bodies of Evidence* moves beyond the borders of detective fiction scholarship by exploring the worlds constructed by these authors in their novels and showing how they intersect with other political, cultural, and economic discourses and with the lived experiences of contemporary Japanese women.

urban mystery hints: A History of Ecology and Environmentalism in Spanish American Literature Scott M. DeVries, 2013-09-05 A History of Ecology and Environmentalism in Spanish American Literature undertakes a comprehensive ecocritical examination of the region's literature from the foundational texts of the nineteenth century to the most recent fiction. The book begins with a consideration of the way in which Argentine Domingo Faustino Sarmiento's views of nature through the lens of the categories of "civilization" and "barbarity" from Facundo (1845) are systematically challenged and revised in the rest of the century. Subsequently, this book develops the argument that a vital part of the cultural critique and aesthetic innovations of Spanish American modernismo involve an ecological challenge to deepening discourses of untamed development from Europe and the United States. In other chapters, many of the well-established titles of regional and indigenista literature are contrasted to counter-traditions within those genres that express aspects of environmental justice, "deep ecology," the relational role of emotion in nature protectionism and conservationism, even the rights of non-human nature. Finally, the concluding chapters find that the articulation of ecological advocacy in recent fiction is both more explicit than what came before but also impacts the formal elements of literature in unique ways. Textual conventions such as language, imagery, focalization, narrative sequence, metafiction, satire, and parody represent innovations of form that proceed directly from the ethical advocacy of environmentalism. The book concludes with comments about what must follow as a result of the analysis including the revision of canon, the development of literary criticism from novel approaches such as critical animal studies, and the advent of a critical dialogue within the bounds of Spanish American environmentalist literature. A History of Ecology and Environmentalism in Spanish American Literature attempts to develop a sense of the way in which ecological ideas have developed over time in the literature, particularly the way in which many Spanish American texts anticipate several of the ecological discourses that have recently become so central to global culture, current environmentalist thought, and the future of humankind.

urban mystery hints: Signs, Wonders, and Gifts Jennifer Eyl, 2019 In much of the scholarship on Paul, activities such as speaking in tongues, prophecy, and miracle healings are either ignored or treated as singular occurrences. Typically, these practices are categorized in such a way that shields Paul and his followers from the influence of so-called paganism. In Signs, Wonders, and Gifts, Jennifer Eyl masterfully argues that Paul did, in fact, engage in range of divinatory and wonder-working practices that were widely recognized and accepted across the ancient Mediterranean. Eyl redescribes, reclassifies, and recontextualizes Paul's repertoire vis-à-vis such widespread, similar practices. Situating these activities within the larger framework of reciprocity that dominated human-divine relationships in antiquity, she demonstrates that divine powers and divine communication were bestowed as benefactions toward Paul and his gentile followers in proportion to their faithfulness and loyalty.

urban mystery hints: Jesus: Evidence and Argument or Mythicist Myths? Maurice Casey, 2014-01-16 Did Jesus exist? In recent years there has been a massive upsurge in public discussion of the view that Jesus did not exist. This view first found a voice in the 19th century, when Christian views were no longer taken for granted. Some way into the 20th century, this school of thought was largely thought to have been utterly refuted by the results of respectable critical scholarship (from both secular and religious scholars). Now, many unprofessional scholars and bloggers ('mythicists'), are gaining an increasingly large following for a view many think to be unsupportable. It is starting to influence the academy, more than that it is starting to influence the views of the public about a crucial historical figure. Maurice Casey, one of the most important Historical Jesus scholars of his generation takes the 'mythicists' to task in this landmark publication. Casey argues neither from a religious perspective, nor from that of a committed atheist. Rather he seeks to provide a clear view of what can be said about Jesus, and of what can't.

urban mystery hints: Skates Made of Bone B.A. Thurber, 2020-02-28 Ice skates made from animal bones were used in Europe for millennia before metal-bladed skates were invented. Archaeological sites have yielded thousands of examples, some of them dating to the Bronze Age.

They are often mentioned in popular books on the Vikings and sometimes appear in children's literature. Even after metal skates became the norm, people in rural areas continued to use bone skates into the early 1970s. Today, bone skates help scientists and re-enactors understand migrations and interactions among ancient peoples. This book explains how to make and use them and chronicles their history, from their likely invention in the Eurasian steppes to their disappearance in the modern era.

urban mystery hints: **Seeing Cities Change** Jerome Krase, 2016-04-01 Cities have always been dynamic social environments for visual and otherwise symbolic competition between the groups who live and work within them. In contemporary urban areas, all sorts of diversity are simultaneously increased and concentrated, chief amongst them in recent years being the ethnic and racial transformation produced by migration and the gentrification of once socially marginal areas of the city. *Seeing Cities Change* demonstrates the utility of a visual approach and the study of ordinary streetscapes to document and analyze how the built environment reflects the changing cultural and class identities of neighborhood residents. Discussing the manner in which these changes relate to issues of local and national identities and multiculturalism, it presents studies of various cities on both sides of the Atlantic to show how global forces and the competition between urban residents in 'contested terrains' is changing the faces of cities around the globe. Blending together a variety of sources from scholarly and mass media, this engaging volume focuses on the importance of 'seeing' and, in its consideration of questions of migration, ethnicity, diversity, community, identity, class and culture, will appeal to sociologists, anthropologists and geographers with interests in visual methods and urban spaces.

urban mystery hints: Evidence of Things Not Seen Rhonda D. Frederick, 2022-07-15 *Evidence of Things Not Seen: Fantastical Blackness in Genre Fictions* is an interdisciplinary study of blackness in genre literature of the Americas. The "fantastical" in fantastical blackness is conceived by an unrestrained imagination because it lives, despite every attempt at annihilation. This blackness amazes because it refuses the limits of anti-blackness. As put to work in this project, fantastical blackness is an ethical praxis that centers black self-knowledge as a point of departure rather than as a reaction to threatening or diminishing dominant narratives. Mystery, romance, fantasy, mixed-genre, and science fictions' unrestrained imaginings profoundly communicate this quality of blackness, specifically here through the work of Barbara Neely, Colson Whitehead, Nalo Hopkinson, and Colin Channer. When black writers center this expressive quality, they make fantastical blackness available to a broad audience that then uses its imaginable vocabularies to reshape extra-literary realities. Ultimately, popular genres' imaginable possibilities offer strategies through which the made up can be made real.

urban mystery hints: Signs of the Signs William Brevda, 2011-05-16

This book is a study of signs in American literature and culture. It is mainly about electric signs, but also deals with non-electric signs and related phenomena, such as movie sets. The sign is considered in both the architectural and semiotic senses of the word. It is argued that the drama and spectacle of the electric sign called attention to the semiotic implications of the sign. In fiction, poetry, and commentary, the electric sign became a sign of manifold meanings that this book explores: a sign of the city, a sign of America, a sign of the twentieth century, a sign of modernism, a sign of postmodernism, a sign of noir, a sign of naturalism, a sign of the beats, a sign of signs systems (the Bible to Broadway), a sign of tropes (the Great White way to the neon jungle), a sign of the writers themselves, a sign of the sign itself. If *Moby Dick* is the great American novel, then it is also the great American novel about signs, as the prologue maintains. The chapters that follow demonstrate

that the sign is indeed a sign of American literature. After the electric sign was invented, it influenced Stephen Crane to become a nightlight impressionist and Theodore Dreiser to make the fire sign his metaphor for the city. An actual Broadway sign might have inspired F. Scott Fitzgerald's *The Great Gatsby*. In *Manhattan Transfer* and *U.S.A.*, John Dos Passos portrayed America as just a spectacular sign. William Faulkner's electric signs are full of sound and fury signifying modernity. *The Last Tycoon* was a sign of Fitzgerald's decline. The signs of noir can be traced to Poe's *The Man of the Crowd*. Absence flickers in the neons of Raymond Chandler's Los Angeles. The death of God haunts the neon wilderness of Nelson Algren. Hitler's empire was an non-intentional parody of Nathanael West's California. The beats reinvented Times Square in their own image. Jack Kerouac's search for the center of Saturday night was a quest for transcendence.

urban mystery hints: *Signs of Life* Rick Fabian, 2019-10-17 A glimpse into the ideals and insights that have shaped one of the Episcopal Church's most widely known parishes, St. Gregory of Nyssa in San Francisco. Rick Fabian, well known as one of the founding priests of St. Gregory of Nyssa in San Francisco, writes his "treatise in eleven parts" on the significant signs of communal life: the welcoming table, authority (human and biblical), baptism, mystery, marriage, children, the spirit, reconciliation, the worship year, beauty, and hospitality. This "revisionist approach to sacramental theology" offers a glimpse into the depth of thought behind the praxis that has shaped one of the Episcopal Church's most widely known parishes.
