veronica novel analysis: The Child Sex Scandal and Modern Irish Literature Joseph Valente, Margot Gayle Backus, 2020 Even though the Irish child sex abuse scandals in the Catholic Church have appeared steadily in the media, many children remain in peril. In The Child Sex Scandal and Modern Irish Literature, Joseph Valente and Margot Gayle Backus examine modern cultural responses to child sex abuse in Ireland. Using descriptions of these scandals found in newspapers, historiographical analysis, and 20th- and 21st-century literature, Valente and Backus expose a public sphere ardently committed to Irish children's souls and piously oblivious to their physical welfare. They offer historically contextualized and psychoanalytically informed readings of scandal narratives by nine notable modern Irish authors who actively, pointedly, and persistently question Ireland's responsibilities regarding its children. Through close, critical readings, a more nuanced and troubling account emerges of how Ireland's postcolonial heritage has served to enable such abuse. The Child Sex Scandal and Modern Irish Literature refines the debates on why so many Irish children were lost by offering insight into the lived experience of both the children and those who failed them.

veronica novel analysis: *Trauma and Recovery in the Twenty-First-Century Irish Novel* Kathleen Costello-Sullivan, 2018-05-07 The desire to engage and confront traumatic subjects was a facet of Irish literature for much of the twentieth century. Yet, just as Irish society has adopted a more direct and open approach to the past, so too have Irish authors evolved in their response to, and literary uses of, trauma. In *Trauma and Recovery in the Twenty-First-Century Irish Novel*, Costello-Sullivan considers the ways in which the Irish canon not only represents an ongoing awareness of trauma as a literary and cultural force, but also how this representation has shifted since the end of the twentieth and beginning of the twenty-first century. While earlier trauma narratives center predominantly on the role of silence and the individual and/or societal suffering that traumas induce, twenty-first-century Irish narratives increasingly turn from just the recognition of traumatic experiences toward exploring and representing the process of healing and recovery both structurally and narratively. Through a series of keenly observed close readings, Costello-Sullivan explores the work of Colm Tóibín, John Banville, Anne Enright, Emma Donohue, Colum McCann, and Sebastian Barry. In highlighting the power of narrative to amend and address memory and trauma, Costello-Sullivan argues that these works reflect a movement beyond merely

representing trauma toward also representing the possibility of recovery from it.

Cynthia Schmidt-Cruz presents close readings and original interpretations of eleven novels, all set in or around Buenos Aires, and explores the ways these texts adapt major motifs, figures, and literary techniques in Hispanic crime fiction in order to give voice to wide-ranging social critiques. Schmidt-Cruz addresses such topics as organized crime and institutional complicity, corruption during the presidency of Carlos Menem (1989-1999), terrorist attacks on Jewish institutions in Buenos Aires and the mysterious death of Alberto Nisman, and the winners and the losers of neoliberal structural changes. With a solid underpinning in sociological studies and criticism of the genre and its historical context, *Argentina Noir* reveals how these novels are renovating the genre to engage pressing issues confronting not only Argentina but also countries throughout Latin America and around the globe.

veronica novel analysis: *Eye Tracking and Visual Analytics* Michael Burch, 2022-09-01

Visualization and visual analytics are powerful concepts for exploring data from various application domains. The endless number of possible parameters and the many ways to combine visual variables as well as algorithms and interaction techniques create lots of possibilities for building such techniques and tools. The major goal of those tools is to include the human users with their tasks at hand, their hypotheses, and research questions to provide ways to find solutions to their problems or at least to hint them in a certain direction to come closer to a problem solution. However, due to the sheer number of design variations, it is unclear which technique is suitable for those tasks at hand, requiring some kind of user evaluation to figure out how the human users perform while solving their tasks. The technology of eye tracking has existed for a long time; however, it has only recently been applied to visualization and visual analytics as a means to provide insights to the users' visual attention behavior. This generates another kind of dataset that has a spatio-temporal nature and hence demands for advanced data science and visual analytics concepts to find insights into the recorded eye movement data, either as a post process or even in real-time. This book describes aspects from the interdisciplinary field of visual analytics, but also discusses more general approaches from the field of visualization as well as algorithms and data handling. A major part of the book covers research on those aspects under the light and perspective of eye tracking, building synergy effects between both fields – eye tracking and visual analytics – in both directions, i.e. eye tracking applied to visual analytics and visual analytics applied to eye tracking data. Technical topics discussed in the book include: • Visualization; • Visual Analytics; • User Evaluation; • Eye Tracking; • Eye Tracking Data Analytics; Eye Tracking and Visual Analytics includes more than 500 references from the fields of visualization, visual analytics, user evaluation, eye tracking, and data science, all fields which have their roots in computer science. Eye Tracking and Visual Analytics is written for researchers in both academia and industry, particularly newcomers starting their PhD, but also for PostDocs and professionals with a longer research history in one or more of the covered research fields. Moreover, it can be used to get an overview about one or more of the involved fields and to understand the interface and synergy effects between all of those fields. The book might even be used for teaching lectures in the fields of information visualization, visual analytics, and/or eye tracking.

veronica novel analysis: *Learning, Teaching, and Community* Lucinda Pease-Alvarez,

Sandra R. Schecter, 2006-04-21 This volume brings together established and new scholarly voices to explore how participatory and situated approaches to learning can contribute to educational innovation. The contributors' critical examinations of educational programming and engagements provide insights into how educators, youth, families, and community members understand and enact their commitments to diversity and equitable access. Collectively, these essays complicate notions of community, alerting readers to ways in which community can be constructed other than in geographical and ethnoracial terms--as alliances and collaborations of individuals joining together to accomplish or negotiate shared agendas. The focus on agency combined with social context, a dialectic to which all of the authors speak, enlarges and invigorates our sense of what is pedagogically possible in societies characterized by diversity and flux. *Part I, Linking Pedagogy to Communities, focuses on dynamic initiatives where practitioners collaborate with community members and other professionals as they acknowledge and build on the cultural, linguistic, and intellectual resources of ethnic-minority students and their communities. *Part II, Professional Learning for Diversity, centers on the authors' experiences in facilitating opportunities for working with prospective and practicing teachers to develop situated pedagogies, highlighting both the

challenges that emerge and the transformations that occur. *Part III, Learning in Community (and Community in Learning), illustrates how educational innovation can extend beyond the realm of schools and classrooms by elucidating ways in which individuals construct learning venues in out-of-school settings. Learning, Teaching, and Community: Contributions of Situated and Participatory Approaches to Educational Innovation is a compelling and timely text ideally suited for courses focused on teacher education and development, informal learning, equity and education, multilingual and multicultural education, language and culture, educational foundations, and school reform/educational restructuring, and will be equally of interest to faculty, researchers, and professionals in these areas.

Bickmore, 2018-11-23 When Loss Gets Personal considers how secondary English language arts teachers and teacher educators can sensitively and thoughtfully teach pieces of literature in their classrooms in which death is a significant, if not central, aspect of the texts. Death is something that affects all people young and old, yet it is rarely discussed openly in classrooms despite its prevalence in texts read in ELA classrooms. Whether it is canonical or contemporary literature, middle grades or young adult literature, fiction, nonfiction, or graphic novels, literature provides a vehicle to have difficult but needed conversations about personal deaths such as cancer, accidents, suicide, etc. Each chapter in this book focuses on 1-2 texts and provides practical activities that ask students to engage with the loss through writing assignments, projects, activities, and discussion prompts in order to build empathy, understanding, and develop critically-minded and engaged students. When Loss Gets Personal will be of interest to English language arts teachers, teacher educators, librarians, and scholars who wish to explore with their students the complex emotions that revolve around discussing deaths that occur in literature.
