Initial Assembly and Preparation

Begin by unpacking the diffuser and checking all included components. Place the unit on a flat, stable surface away from direct sunlight and heat sources. Remove the lid or cover as described in the manual, ensuring you do not force any parts. Connect the power adapter to the diffuser and plug it into a suitable outlet.

Adding Water and Essential Oils

Using the included measuring cup, fill the water tank with clean, room-temperature water up to the maximum fill line. Add a recommended amount of essential oil—typically 2-5 drops—depending on the size of the tank and your fragrance preference. Avoid using corrosive or thick oils, as they may damage the unit.
