western society research materials pdf: New Approaches to the Study of Esotericism , 2020-12-15 This volume offers new approaches to some of the biggest persistent challenges in the study of esotericism and beyond. Commonly understood as a particularly Western undertaking consisting of religious, philosophical, and ritual traditions that go back to Mediterranean antiquity, this book argues for a global approach that significantly expands the scope of esotericism and highlights its relevance for broader theoretical and methodological debates in the humanities and social sciences. The contributors offer critical interventions on aspects related to colonialism, race, gender and sexuality, economy, and marginality. Equipped with a substantial introduction and conclusion, the book offers textbook-style discussions of the state of research and makes concrete proposals for how esotericism can be rethought through broader engagement with neighboring fields.

western society research materials pdf: Research from Archival Case Records Philip C.C. Huang, Kathryn Bernhardt, 2014-04-30 Legal history studies have often focused mainly on codified law, without attention to actual practice, and on the past, without relating it to the present. As the title—Research from Archival Case Records: Law, Society, and Culture in China—of this book

suggests, the authors deliberately follow the research method of starting from court actions and only on that basis engage in discussions of laws and legal concepts and theory. The articles cover a range of topics and source materials, both past and present. They provide some surprising findings—about disjunctures between code and practice, adjustments between them, and how those reveal operative principles and logics different from what the legal texts alone might suggest. Contributors are: Kathryn Bernhardt, Danny Hsu, Philip C. C. Huang, Christopher Isett, Yasuhiko Karasawa, Margaret Kuo, Huaiyin Li, Jennifer M. Neighbors, Bradly W. Reed, Matthew H. Sommer, Huey Bin Teng, Lisa Tran, Elizabeth VanderVen, and Chenjun You.

western society research materials pdf: *Review of the state of world marine fishery resources - 2025* Food and Agriculture Organization of the United Nations, Sharma, R. (ed.); Barange, M. (ed.); Agostini, V. (ed.); Barros, P. (ed.); Gutierrez, N.L. (ed.); Vasconcellos, M. (ed.); Fernandez Reguera, D. (ed.); Tiffay, C. (ed.); Levontin, P. (ed.), Marine fisheries are crucial to the food security and nutrition, economy and overall well-being of coastal communities. Maintaining the long-term prosperity and sustainability of marine fisheries is therefore not only ecologically significant, but has social, economic and political importance. The aim of this report is to provide FAO Members, national and regional policymakers, academia, civil society, fishers and managers of world fishery resources with a comprehensive, objective and global review of the state of the living fishery resources of the oceans. This document updates the regular reviews of the state of the world's marine fishery resources, based on stock assessments and complementary information up to 2023, and official catch statistics through to 2021. The introductory and methodology chapters provide the wider context in which this updated edition of the Review of the state of world marine fishery resources was prepared, highlighting evolutions in the landscape of fisheries and stock assessment capacities since the previous edition of this report in 2011. The methodology section gives a detailed overview of the updated FAO process for providing the state of stocks index, which involved a highly participatory and transparent process (including 19 regional workshops and consultations, with around 650 in-person experts representing 92 countries and 200 organizations). Importantly, the total number of stocks in the assessments included in this report has significantly increased to 2 570. Discussions on major trends and changes at the global level are explored in a dedicated global overview chapter, while more detailed information on the status of stocks for each of the FAO Major Fishing Areas is set out in dedicated regional chapters. Special sections address the global issue of tunas and tuna-like species, and other high-profile fisheries such as deep-sea fisheries in areas beyond national jurisdiction, and highly migratory sharks. Summary tables are provided for each species grouping used in this assessment, indicating the number of stocks included, their sustainability classification between overfished, maximally sustainably fished, and underfished categories, and the number of stocks classified into tiers based on the availability and quality of information and thus the assessment methods used.
