whitehead latest publication: Unveiling Structures in Colson Whitehead's Fiction Paula Martín-Salván, 2025-10-03 This book offers a comprehensive critical analysis of Colson Whitehead's fiction, positioning him as a key figure in both African American literature and the global "turn to genre". It explores how Whitehead employs conventions from popular genres—such as detective, zombie and caper stories—not merely for entertainment, but as tools for ideological critique and narrative innovation. Central to the study is the concept of "narratives of unveiling", in which information is revealed retrospectively, disrupting linear storytelling and reshaping ethical perspectives. These structures allow Whitehead to expose the systemic roots of racism and ideological conflict embedded in American society. The book situates his work within broader debates about canon formation, Afropessimist and postsoul aesthetics, and the politics of form. Through close readings of Whitehead's novels, it demonstrates how Whitehead challenges racial myths and signifies genre expectations, offering narratives that performatively enact cultural critique.

whitehead latest publication: *The Epochal Nature of Process in Whitehead's Metaphysics* F. B. Wallack, 1980-06-30 While my book attempts to reflect the full range of scholarly debate, I have also attempted to make it useful to anyone interested in Whitehead. To this end, I have introduced the Whiteheadian terms one by one, explaining each in the light of my interpretation, and I have used examples wherever possible. I try to show that Whitehead intended his philosophy have a place in our lives by reshaping our common conceptions, and that he did not intend it to be relegated to purely abstract or esoteric application. — F. Bradford Wallack The twentieth century has seen the greatest innovations in philosophical cosmology since Newton and Descartes, and Alfred North Whitehead was the first and greatest of the philosophers to work out these innovations in systematic ways. In a book that will be controversial in the philosophical community, F. Bradford Wallack argues that interpretations widely accepted by Whiteheadians need revaluation because these interpretations are based on materialist and substantialist assumptions that Whitehead sought to replace. Specifically, she proposes a thorough revision of accepted interpretations of Whitehead's concept of the actual entity. Wallack then elucidates Whitehead's ideas in order of their increasing dependence upon other basic Whiteheadian terms to complete the study of Whiteheadian time and to clarify its purpose within the cosmology of Process and Reality. Whitehead's philosophy then emerges as more intelligible and cohesive than is generally believed.

whitehead latest publication: *Perspective in Whitehead's Metaphysics* Stephen David Ross, 1983-06-30 Stephen David Ross presents an extensive, detailed, and critical interpretation of Whitehead's mature thought, emphasizing the fundamental role of perspective in Whitehead's cosmology, and tracing the conflicts and difficulties therein to tensions involving perspective in relation to other central features of Whitehead's thought. Ross isolates four principles as having a fundamental role in whitehead's metaphysics: perspective, cosmology, experience, and mechanical analysis. He argues that many of Whitehead's difficulties can be eliminated by raising the principle of perspective to prominence and by revising the other central features of Whitehead's theory accordingly. This book addresses key Whiteheadian texts and secondary interpretations of Whitehead. The discussion ranges over most of Whitehead's theory in Process and Reality, and offers a number of significant and, in some cases, novel views on different aspects of Whitehead's theory: perception, prehension, causation, objective immortality, self-causation, the extensive continuum,

natural order, possibility, concreteness, and God. Ross's concluding suggestions for modifying Whitehead's system promise to occasion much debate among process philosophers, theologians, and anyone concerned with Whitehead's thought.

whitehead latest publication: A.N. Whitehead's Thought through a New Prism Aljoscha Berve, Helmut Maassen, 2017-01-06 This volume brings together the proceedings of the "European Summer School for Process Thought", which took place in Mülheim, Germany, in August 2012. It explores Alfred North Whitehead's thinking in different fields of science, connecting his philosophical writings with physics, religion, education, psychology and aesthetics. The first part of the book is concerned with Whitehead's philosophical methodology, discussing a plethora of subjects, including the interdependence between some of Whitehead's works, the role of logic in his style of argument, concepts of time, the role of symbolism, and the relation between specialized terminology and the colloquial in Whitehead's philosophy. The second part explores applications for the concepts of Whitehead's thinking in a broader context. In scientific fields as diverse as physics, theological and classical Chinese religious thought, concepts of education and psychological theories of embodiment, Whitehead's basic philosophical concepts have been implemented in various different ways. As such, this book holds an interdisciplinary appeal for Whitehead scholars from different scientific backgrounds.

whitehead latest publication: Whitehead's Philosophy Janusz A. Polanowski, Donald W. Sherburne, 2012-02-01 This volume explores the range of Alfred North Whitehead's philosophy and his relevance to contemporary philosophical traditions. While philosophers and theologians with only a passing acquaintance with Whitehead might think that his philosophy is unconnected to our Western philosophical tradition, the contributors prove that nothing could be further from the truth. The most respected scholars in the field—George Allan, Lisa Bellantoni, John B. Cobb Jr., Frederick Ferré, David L. Hall, William S. Hamrick, Robert Cummings Neville, Janusz A. Polanowski, Patrick Shade, and Donald W. Sherburne—illustrate points of connection between Whitehead's ideas to the following: Descartes, the so-called Father of Modern Philosophy; classical American thought; several contemporary American thinkers, including Richard Rorty and Alasdair MacIntyre; aspects of European philosophy; and current reflections upon the environment and technology.

whitehead latest publication: Whitehead's Pancreativism Michel Weber, 2013-05-02 There is one question that any potential reader who suspects that Alfred North Whitehead (1861-1947) might be important for past, contemporary, and future philosophy inevitably raises: how should I read Whitehead? How can I make sense of this incredibly dense tissue of imaginative systematizing, spread over decades of work in disciplines so different and specialized as algebra, geometry, logic, relativistic physics and philosophy of science? Accordingly, this monograph has two main complementary objectives. The first one is to propose a set of efficient hermeneutical tools to get the reader started. These straightforward tools provide answers that are highly coherent and probably the most applicable to Whitehead's entire corpus. The second objective is to illustrate how the several parts of Process and Reality are interconnected, something that all commentators have either failed to recognise or only incompletely acknowledged.

whitehead latest publication: Whitehead's Religious Thought Daniel A. Dombrowski, 2016-11-23 Presents the process theistic thought of Whitehead as a third alternative between classical theism and religious skepticism. This original interpretation of the religious thought of

Alfred North Whitehead highlights Whitehead's moves from mechanism to organism, and from force to persuasion to offer a third alternative between classical theism and religious skepticism. Daniel A. Dombrowski argues that the move from force to persuasion, in particular, is not only fundamental to Whitehead's own thought and to process thought in general, but is a necessary condition for the continuing existence of civilized life. Following this line of analysis, Dombrowski demonstrates Whitehead's relevance to contemporary work in philosophy of mind, political philosophy, and environmental ethics by placing him in dialogue with six major thinkers: David Ray Griffin, Isabelle Stengers, John Rawls, Charles Hartshorne, Judith Butler, and William Wordsworth. "This mature synthesis of the full range of central concerns that have played out across Dombrowski's long and extraordinarily productive career represents an important contribution to the contemporary literature of process thought. Moreover, because his work has always embraced influences from outside of the process community, this book will have the additional value of introducing many process-oriented readers to nonprocess perspectives, which Dombrowski presents with great care and accuracy." — Derek Malone-France, author of *Faith, Fallibility, and the Virtue of Anxiety: An Essay in Religion and Political Liberalism*

whitehead latest publication: Time, Temporality, Now Harald Atmanspacher, Eva Ruhnau, 2012-12-06 The essays in this topical volume inquire into one of the most fundamental issues of philosophy and of the cognitive and natural sciences: the riddle of time. The central feature is the tension between the experience and the conceptualization of time, reflecting an apparently unavoidable antinomy of subjective first-person accounts and objective traditional science. Is time based in the physics of inanimate matter, or does it originate in the operation of our minds? Is it essential for the constitution of reality, or is it just an illusion? Issues of time, temporality, and nowness are paradigms for interdisciplinary work in many contemporary fields of research. The authors of this volume discuss profoundly the mutual relationships and inspiring perspectives. They address a general audience.

The "biographical " entries provide (i) a brief vita of the targeted thinker; (ii) a sketch of his/her categories relevant to the Whiteheadian scholarship; (iii) a personal assessment of the actual (or possible) Whiteheadian semantic transfer to or from the thinker.
