wheel of time pdf: Fantasy Literature Mark A. Fabrizio, 2016-10-11 Fantasy literature, often derided as superficial and escapist, is one of the most popular and enduring genres of fiction worldwide. It is also—perhaps surprisingly—thought-provoking, structurally complex, and relevant to contemporary society, as the essays in this volume attest. The scholars, teachers, and authors represented here offer their perspectives on this engaging genre. Within these pages, a reader will find a wealth of ideas to help teachers use these texts in the classroom, challenging students to read

fantasy with a critical eye. They employ interdisciplinary, philosophical, and religious lenses, as well as Marxist and feminist critical theory, to help students unlock texts. The books discussed include epic fantasy by such authors as Tolkien and Le Guin, children's fantasy by Beatrix Potter and Saint-Exupéry, modern fantasy by Rowling and Martin, and even fairy tales and comic books. The contributors offer provocations, questioning the texts and pushing the boundaries of meaning within the fantasy genre. And in doing so, they challenge readers themselves to ponder these tales more deeply. But through each of these chapters runs a profound love of the genre and a respect for those who produce such beautiful and moving stories. Furthermore, as with all the books in this series, this volume is informed by the tenets of critical pedagogy, and is focused on re-envisioning fantasy literature through the lens of social justice and empowerment. Prepare to be challenged and inspired as you read these explorations of a much-loved genre.

wheel of time pdf: Learning With Spheres Anuj Misra, 2022-09-01 This book provides, for the very first time, a critical edition and an English translation (accompanied by critical notes and technical analyses) of the chapter on spheres (golādhyāya) from Nityānanda's Sarvasiddhāntarāja, a Sanskrit astronomical text written in seventeenth-century Mughal India. Readers will learn how terrestrial and celestial phenomena were understood by early modern Sanskrit astronomers using spherical geometry. The technical discussions in this book, supported by the critically edited Sanskrit text and geometric diagrams, offer an opportunity for historians of the astral sciences to understand developments in astronomy in seventeenth-century Mughal India from a more nuanced perspective. These are supplemented through explorations of modernity, mathematics, and mythology and how they thrived within Sanskrit astronomical discourse at the courts of the Mughal emperors. This book will be of interest to historians and philosophers of science, in particular those interested in the history of non-Western astral sciences. The book will be a valuable resource for scholars studying the general history of Sanskrit astronomy in the Indian subcontinent as well as those interested in the technical aspects of Sanskrit and Indo-Persian astronomy in Mughal India.

wheel of time pdf: The Faults of Meat Geoffrey Barstow, 2019-10-01 Vegetarianism is a hotly debated topic within Buddhist circles. This book provides a valuable new contribution to the discussion with translations of thirteen Tibetan texts focused on the ethical problems associated with eating meat, coming from a wide variety of perspectives and lineages. Should all Buddhists be vegetarian? Vegetarianism is an important topic of debate in Buddhist circles—some argue that Buddhists should avoid meat entirely while others suggest that it is acceptable. For the most part, however, this ethical query has been conducted in the West without consulting traditional literature on the subject. The Faults of Meat brings together for the first time a collection of rich and intricate explorations of authoritative Tibetan views on eating meat. These fourteen nuanced texts, ranging from scholastic treatises to poetic verse, reveal vegetarianism as a significant, ongoing issue of debate for Tibetans across time and traditions, with a wide variety of voices marshaled against meat, and a few in favor. Authors include many important Tibetan teachers: Dolpopa Sherab Gyaltzen (1292-1361) Khedrup Jé (1385-1438) The eighth Karmapa, Mikyö Dorjé (1507-1554) Shabkar Tsokdrük Rangdröl (1781-1851) Khenpo Tsultrim Lodrö (1961-) and many more. These Buddhist teachers recognize both the ethical problems that surround meat eating and the practical challenges of maintaining a vegetarian diet; their skilled arguments are illuminated further by the translators' introductions to each work. The perspectives in The Faults of Meat are strikingly relevant to our discussions of vegetarianism today; they introduce us to new approaches and solutions to a contentious issue for Buddhists.
