verniece enciso biography: *An Eye on Race* John Beusterien, 2006 Racism in the modern nation state is based on a Continental and an American model. In the Continental model, the racist differentiates the raced individual by religion. Because this raced individual is indistinguishable from the racist, a narrative is written to see that individual. In turn, in the American model the racist differentiates the raced individual based on skin color. Because the sign of difference is obvious, no story is written to justify racist thinking. By 1550, both models form part of imperial thinking in the Iberian world system. *An Eye on Race: Perspectives from Theater in Imperial Spain* describes these models at work in imperial Spanish theater. The study reveals how the display of blood in drama serves the Continental model and how the display of skin color serves the American model. It also elucidates how Miguel de Cervantes celebrates a subaltern aesthetic as he discards both racial

paradigms. John Beusterien is Associate Professor of Spanish at Texas Tech University.

It promotes resilience and serves as a basis for adapting livestock management to changing conditions. It is vital to livelihoods of many of the world's poor people. It can contribute to the delivery of ecosystem services such as landscape management and the maintenance of wildlife habitats. However, it is often undervalued, underused and under threat. This report updates the global assessment provided in the first report on The State of the World's Animal Genetic Resources for Food and Agriculture, published in 2007. It focuses particularly on changes that have occurred during the period since the first report was published. It serves as a basis for a review, and potential update, of the Global Plan of Action for Animal Genetic Resources, which since 2007 has provided an agreed international framework for the management of livestock biodiversity. Drawing on 129 country reports, it presents an analysis of the state of livestock diversity, the influence of livestock-sector trends on the management of animal genetic resources, the state of capacity to manage animal genetic resources, including legal and policy frameworks, and the state of the art in tools and methods for characterization, valuation, use, development and conservation.

verniece enciso biography: Staging Habla de Negros Nicholas R. Jones, 2019-05-01 In this volume, Nicholas R. Jones analyzes white appropriations of black African voices in Spanish theater from the 1500s through the 1700s, when the performance of Africanized Castilian, commonly referred to as habla de negros (black speech), was in vogue. Focusing on Spanish Golden Age theater and performative poetry from authors such as Calderón de la Barca, Lope de Rueda, and Rodrigo de Reinosa, Jones makes a strong case for revising the belief, long held by literary critics and linguists, that white appropriations and representations of habla de negros language are "racist buffoonery" or stereotype. Instead, Jones shows black characters who laugh, sing, and shout, ultimately combating the violent desire of white supremacy. By placing early modern Iberia in conversation with discourses on African diaspora studies, Jones showcases how black Africans and their descendants who built communities in early modern Spain were rendered legible in performative literary texts. Accessibly written and theoretically sophisticated, Jones's groundbreaking study elucidates the ways that habla de negros animated black Africans' agency, empowered their resistance, and highlighted their African cultural retentions. This must-read book on identity building, performance, and race will captivate audiences across disciplines.
