ut martin campus life: Inaugural Ballers Andrew Maraniss, 2022-09-13 From the New York Times bestselling author of *Strong Inside* comes the inspirational true story of the birth of women's Olympic basketball at the 1976 Summer Games and the ragtag team that put US women's basketball on the map. Perfect for fans of Steve Sheinkin and Daniel James Brown. *A League of Their Own* meets *Miracle* in the inspirational true story of the first US Women's Olympic Basketball team and their unlikely rise to the top. Twenty years before women's soccer became an Olympic sport and two decades before the formation of the WNBA, the '76 US women's basketball team laid the foundation for the incredible rise of women's sports in America at the youth, collegiate, Olympic, and professional levels. Though they were unknowns from small schools such as Delta State, the University of Tennessee at Martin and John F. Kennedy College of Wahoo, Nebraska, at the time of the '76 Olympics, the American team included a roster of players who would go on to become some of the most legendary figures in the history of basketball. From Pat Head, Nancy Lieberman, Ann Meyers, Lusia Harris, coach Billie Moore, and beyond—these women took on the world and proved everyone wrong. Packed with black-and-white photos and thoroughly researched details about the

beginnings of US women's basketball, *Inaugural Ballers* is the fascinating story of the women who paved the way for girls everywhere.

ut martin campus life: *Bearing the Torch* T.R.C. Hutton, 2023-09-29 *Bearing the Torch* stands as a comprehensive history of the University of Tennessee, replete with anecdotes and vignettes of interest to anyone interested in UT, from the administrators and chancellors to students and alums, and even to the Vols fans whose familiarity with the school comes mainly from the sports page. It is also a biography of a school whose history reflects that of its state and its nation. The institution that began as Blount College in 1794 in a frontier village called Knoxville exemplifies the relationship between education and American history. This is the first scholarly history of UT since 1984. T. R. C. Hutton not only provides a much-needed update, but also seeks to present a social history of the university, fully integrating historical context and showing how the volume's central "character"—the university itself—reflects historical themes and concerns. For example, Hutton shows how the school's development was hampered in the early nineteenth century by stingy state funding (a theme that also appears in subsequent decades) and Jacksonian fears that publicly funded higher education equaled elite privilege. The institution nearly disappeared as the Civil War raged in a divided region, but then it flourished thanks to policies that never could have happened without the war. In the twentieth century, students embraced dramatic social changes as the university wrestled with race, gender, and other important issues. In the Cold War era, UT became a successful research institution and entered into a deep partnership with Oak Ridge National Laboratories that persists to this day. All the while UT athletics experienced the highs of national championships and the lows of lawsuits and losing seasons. UT is a university with a universe of historical experiences. The University of Tennessee's story has always been defined by inclusion and exclusion, and the school has triumphed when it practiced the former and failed when it took part in the latter. *Bearing the Torch* traces that ongoing process, richly detailing the University's contributions to what one president, Joseph Estabrook, called the "diffusion of knowledge among the people."

ut martin campus life: Texas Caesar J. Brent Clark, 2015-09-25 The iconic college football

coaches of the twentieth century emerged after World War II, bringing with them a military bearing and a love of war without casualties. Coach Darrell Royal's life reads like a Shakespearean tragedy, replete with victory, defeat, betrayal and sorrow. Bear Bryant of Alabama, Bud Wilkinson of Oklahoma and Darrell Royal of Texas. What they accomplished over their lifetimes as coaches could not have happened anywhere in the United States except the post-war South. From the advent of television in the mid-1950s through the desegregation of universities and athletic programs following the Civil Rights Act of 1964, Coach Royal led the conflicted life of a warrior, a father and a servant to the rich and powerful. Forbes Magazine has stated the UT-Austin athletic program is the most valuable in the country, worth an estimated 180 million dollars. The UT financial statement doesn't reveal how big money and political power overshadow the games and the young athletes who play them. In the beginning, there was sorrow and loneliness. Darrell Royal's mother, Katy, died three months after he was born, in 1924, leaving him in the hands of an inattentive father of six children and a veritable string of evil stepmothers. Darrell found his father figure and mentor in Bud Wilkinson, the courtly head coach of the mighty Oklahoma Sooners. In Norman, Darrell emulated Bud and for the first time, knew glory as an All-American player with a fiercely competitive spirit. By the early 1960s, Royal's job-hopping had landed him in Austin where the possibilities of gridiron glories remained unrealized. Royal was a perfect fit to change that. Television was bringing college football into the homes of Americans nationwide. Bryant, Wilkinson and Royal had an advantage. Each was telegenic, articulate and charismatic. The celebrity football coaches were earning their places in history by winning games but also by evolving into actors on a national stage. The fall of 1963 changed the lives of all Americans. Royal's Longhorns, ranked number two in the Associated Press, defeated Oklahoma, ranked number one, and went on to an undefeated season and Texas' first ever national championship. Scarcely a month later, also in Dallas, President Kennedy was assassinated. His successor was a Texan Lyndon Baines Johnson. Royal's life was going to be influenced in ways he could scarcely imagine and certainly couldn't control. Texas has always been a provocative political environment. A Texas politician has to yell long and loud to get noticed in the vastness of the State. Since winners migrate to other winners, post-1963, Darrell and Edith Royal were on everyone's A list for political and social events. The oligarchs who called the shots at UT also made it clear to Coach Royal. They didn't want any coloreds on their football team. While Royal coached the 1969 Longhorns to another national championship, the team regrettably was dubbed, the last lily white national championship team. Eventually, the tightrope Royal was being forced to walk began to wobble uncontrollably. It was the spring of 1974 before Royal finally landed a black student-athlete to whom he could point with pride. The young man was Earl Campbell, the Tyler Rose. Bryant, Wilkinson and Royal are gone now. There are statues and street names and even campus stadiums named after them. The game they knew and coached is gone as well. As a result, we are left with the historical perspective they gave us, punctuated by the agonizing undercurrents that changed the game and changed a nation.

ut martin campus life: The New American College Town James Martin, James E. Samels, 2019-11-19 A new perspective on the relationships among colleges, universities, and the communities with which they are now partnering. Colleges and universities have always had interesting relationships with their external communities, whether they are cities, towns, or something in between. In many cases, they are the main economic driver for their regions—State College, Pennsylvania, or Raleigh, North Carolina, for example—and in others, they exist side by side with thriving industries. In The New American College Town, James Martin, James E. Samels &

Associates provide a practical guide for planning a new kind of American college town—one that moves beyond the nostalgia-tinged stereotype to achieve collaborative objectives. What exactly is a college town in America today? Examining the broad range of partnerships transforming campuses and the communities around them, the book opens by detailing twenty characteristics of new American college towns. Subsequent chapters invite presidents, provosts, planners, mayors, architects, and association directors to share their views on how college town relationships are shaping new generations of students and citizens. The book tackles urban and rural institutions, as well as community colleges, and closes with predictions about what college towns will look like in twenty-five years. Contributors include presidents from Lehigh, Portland State, New Jersey City, and Connecticut College, along with five college town mayors and the current or former executive directors from the International Town-Gown Association, the Association for the Study of Higher Education, and others. The book also traces how town-gown relations are expanding into innovative areas nationally and internationally, moving beyond familiar student life programs and services to hundred-million-dollar downtown developments. The first comprehensive, single-volume resource designed for leaders on both sides of these conversations, *The New American College Town* includes action plans, lessons learned, and pitfalls to avoid in developing transformative relationships between colleges and their extended communities.
